

I am writing to say that I do not want to loose my Airl station in the San Fernando Valley area due to the LPFM. I currently am forced to pick up the San Bernardino station at 90.1 due to the Pasadena station (90.3) being over-ridden by a more local station. I'm upset that I have to have a static filled station to begin with... now you want to take it away all together. This does not make me happy!
